

City of Sauk Rapids Snowplowing and Ice control Policy

1. Introduction

The city of Sauk Rapids, Minnesota, finds that it is in the best interest of the residents of the city to assume basic responsibility for control of snow and ice on city streets. Reasonable ice and snow control is necessary for routine travel and emergency services. The city will attempt to provide such control in a safe and cost effective manner, keeping in mind safety, budget, personnel, and environmental concerns. The city will use city employees, equipment and/or private contractors to provide this service. This policy does not relieve the operator of private vehicles, pedestrians, property owners, residents and all others that may be using public streets, of their responsibility to act in a reasonable, prudent and cautious manner, given the prevailing street conditions.

2. When Will the City Start Snow or Ice Control Operations?

Public works management will decide when to begin snow or ice control operations. The criteria for that decision are:

- A. Snow accumulation of three (3) inches or more;
- B. Drifting of snow that causes problems for travel;
- C. Icy conditions which seriously affect travel; and
- D. Time of snowfall in relationship to heavy use of streets.

Snow and ice control operations are expensive and involve the use of limited personnel and equipment. Consequently snowplowing operations will not generally be conducted for snowfall of less than three (3) inches.

3. How Snow will be Plowed

Snow will be plowed in a manner so as to minimize traffic obstructions. The center of the roadway will be plowed first. The snow shall then be pushed from left to right on two-way streets. On one-way streets or where there is a center boulevard, snow may be pushed in either direction. The discharge shall go onto the boulevard area of the street. Snow on cul-de-sacs will normally be pushed off into snow storage areas behind the curb. Because of utilities and driveway locations which limit snow storage in cul-de-sacs, the city reminds residents that there is generally a 15-foot city right of way behind the curb for snow storage. The plowing/hauling of cul-de-sacs is an attempt to provide the largest turning radius possible for emergency vehicle ingress and egress. When a plow goes on a bridge, the driver shall slow down so snow does not go over the bridge, if possible. In times of extreme snowfall, streets will not always immediately be able to be completely cleared of snow.

4. Snow Removal after Plowing

Public Works management will determine if and when snow will be removed from the area by truck. Such snow removal will occur in areas where there is no room on the boulevard for snow storage and in areas where accumulated piles i.e. cul-de-sacs of snow create a hazardous condition. Snow removal operations will not commence until other snowplowing operations have been completed. Snow removal operations may also be delayed depending on weather conditions, personnel and budget availability. The snow will be removed and hauled to a snow storage area. The snow storage area will be located so as to minimize environmental problems

5. Priorities and Schedule of Streets to be Plowed

The city has classified city streets based on the street function, traffic volume and importance to the welfare of the community. Those streets classified as "Snow Plow Routes" will be plowed first. These are high volume routes, which connect major sections of the city and provide access for emergency fire, police, and medical services. The second priority streets are those streets providing access to schools and commercial businesses. The third priority streets are low volume residential streets. The fourth priority areas are alleys and city parking lots.

During significant and severe storms, the city must be prepared to move personnel and equipment to maintain priority routes first. In fulfilling the need to have all priority streets safe and passable, when resources are limited, plowing of all other streets may be stopped at any time so resources can be shifted to priority routes.

Unforeseeable circumstances may cause delays in completing assigned plow routes. Such circumstances may include weather conditions that endanger the safety of snowplow operators and/or safe and effective operation of equipment, commuter traffic, disabled vehicles, poor visibility conditions, parked cars along streets, assistance to emergency response vehicles, equipment breakdown, and personnel shortages. Area will be located so as to minimize environmental problems.

6. Work Schedule for Snowplow Operators Snowplow operators will be expected to work eight-hour shifts. In severe snow emergencies, operators sometimes have to work in excess of eight-hour shifts. After a fourteen-hour shift, the operators will be replaced if additional qualified personnel are available.

7. Traffic Regulations

The city recognizes that snowplow operators are exempt from traffic regulations set forth in Minnesota Statutes, Chapter 169 while actually engaged in work on streets, except for regulations related to driving while impaired and the safety of school children. Pursuant to this authority, snowplow operators engaged in snow removal or ice control on city streets have discretion to disregard traffic laws set forth in Chapter 169, except for laws relating to impaired driving and school children safety, when in their judgment, it is safe to disregard such laws. The privileges granted herein to operators of snow removal and ice control vehicles shall apply only if the vehicle is equipped with lamp or lamps displaying a flashing, oscillating, or rotating light or lights placed in such a position on the vehicle as to be visible throughout an arc of 360 degrees.

8. Weather Conditions

Snow and ice control operations will be conducted only when weather conditions do not endanger the safety of snowplow operators and equipment. Factors that may delay snow and ice control operations include: severe cold, significant winds, and limited visibility.

9. Use of Sand, Salt, and Other Chemicals

The city will use sand, salt, and other chemicals when there are hazardous ice or slippery conditions. The city is concerned about the effect of such chemicals on the environment and will limit its use for that reason.

10. Sidewalks

As there are a limited number of personnel available, the city will only maintain their sidewalks after the streets have been plowed. It is the responsibility of the resident and/or property owner to remove all accumulated snow from all other sidewalks along public streets adjoining their property. This includes any snow plowed from public streets onto the sidewalk.

11. Mailboxes

Damage to a mailbox is a risk that snowplow operators face during their winter plowing requirements. The city will conduct a review of each mailbox damage claim to determine, whether the city has any legal responsibility for the damage and if so, to replace or provide reimbursement for the mailbox. If the city, in its discretion, determines that reimbursement or replacement is appropriate, the city may:

- 1) At the mailbox owner's request, replace the mailbox with a standard size, non decorative metal swinging mailbox or replace the support post as necessary with a 4'x4', decay resistance wood support post, both of which will be installed by the city;
- 2) Provide reimbursement in a reasonable amount for the mailbox and support posts that meet the city's ordinance standards, as well as state and federal requirements for mailbox size, support and placement

12. Lawn sprinklers and landscaping: Lawn sprinklers and or irrigation systems and landscaping installed on the city right of way that is damaged by plowing or snow removal operations will be the responsibility of the property owner to repair.

13. Complaint Procedure

Complaints will be recorded on telephone logs. Calls requiring service will be transferred to a work request and forwarded to the appropriate supervisor for scheduling. Emergency complaints will be handled in an expeditious manner as resources are available.

14. Deviation From Policy

The management at public Works may deviate from this policy when in his or her judgment it is in the best interest of the city or is necessary because of budget needs or other circumstances.
